

Elleta McDaniel

Product Designer, Design Systems, Data Platforms & Complex UX

Barcelona, Spain · Open to Hybrid/Remote · [linkedin.com/in/elleta-mcdaniel](https://www.linkedin.com/in/elleta-mcdaniel)

Profile

Product designer with a focus on design systems, platform architecture, and complex multi-role interfaces. I work at the intersection of system-level thinking and engineering collaboration, building scalable component libraries, defining interaction patterns, and creating governance frameworks that reduce repeated decision-making across teams. My work spans B2B SaaS booking platforms, internal tooling, and data-dense dashboards for high-stakes environments. I'm as comfortable working upstream on system architecture as I am deep in component states and accessibility logic.

Skills

Product Design · Interaction Design · UX Strategy · Data Visualization · Design Systems · Token Architecture · Component Libraries · Figma (Advanced) · Prototyping · Information Architecture · User Research · Usability Testing · Accessibility · Agile / Scrum · Multi-role Dashboards · Cross-functional Collaboration

Credentials

2024, 2025	Brad Frost Web Maker Program Brad Frost
2025	Design Tokens Course Romina Kavčič, The Design System Guide
2025, 2026	Into Design Systems (conference)

Into Design Systems

2025	Smart Interface Design Patterns (workshop) Vitaly Friedman, Smashing Magazine
2026	Designing Complex UIs in the Age of AI (workshop) Vitaly Friedman, Smashing Magazine
2026	Claude Code hackathon Anthropic

Education

Nov 2022, Jan 2023	Ironhack UX/UI Design
Apr 2021, Jan 2022	SheCodes Frontend Developer, Information Technology
2012, 2013	IDEP Barcelona Postgraduate, Fashion Design and Image
2005, 2009	Arizona State University BSc Design, Interior Architecture, 3.9 GPA

Employment

Oct 2025, Current	Product Designer, Design Systems @ Brad Frost Web (Maker Program) · Contract Building a scalable Figma component library aligned with Brad Frost's Atomic Design methodology, contributing to a production-ready design system used across client web interfaces.
-------------------	--

- Defining reusable UI components and interaction patterns to support consistent implementation, with direct input into accessibility standards and usage documentation.
- Contributing to design system governance: component ownership criteria, documentation structure, and the framework for deciding when to extend the system versus build feature-specific solutions.
- Working closely with front-end developers to validate feasibility and ensure design decisions.

Oct 2025,
Current

Design Systems Consultant @ elleta.design

Design Systems Specialist @ a global fashion retailer · Apr 2026, Jul 2026

- Owned cross-platform component governance across Web, iOS, and Android, defining, governing, and releasing reusable components across multiple shared Figma libraries, documented in Zeroheight.
- Established AI-enabled design-system workflows with Claude, Figma MCP, and the Desktop Bridge, enabling automated audits, machine-readable component patterns, and scalable documentation.
- Led design-to-code parity initiatives, bridging Figma and production codebases so the system stays true across design and build.
- Ran accessibility and dark-mode audits across the system, and defined metrics for adoption, coverage, efficiency, and quality.

Product Designer, Data Dashboard Prototype @ UN Office at Geneva (UNOG) · Oct 2025, Dec 2025

- Designed a high-fidelity dashboard prototype supporting operational transparency across multiple UN teams,

translating complex organisational workflows into clear data visualisations and interactive analytics interfaces.

- Conducted stakeholder interviews and requirements gathering across technical and non-technical users to define information architecture and layout structure.
- Created modular UI components and scalable layout patterns suited to a high-stakes, multi-role enterprise environment with strict accessibility and usability requirements.

July 2024, Feb
2026

UX/UI Designer, Product & Design Systems @ a B2B travel platform

- Led the UX transformation of a complex B2B SaaS travel platform, redesigning the booking foundation across flights, car rentals, finance, admin, and multi-role dashboards.
- Built and implemented the company's first scalable design system from scratch: token architecture, reusable component library, and theme support, with tokens integrated directly into production code.
- Re-architected end-to-end booking verticals including search, filtering, sorting, seat selection, and post-booking management, designing consistent interaction patterns across API and edge-case constraints.
- Delivered high-fidelity prototypes for executive and investor presentations, contributing to funding that accelerated product development and team expansion.

Feb 2023, Feb
2024

UX/UI Designer @ VML

- Designed mobile-native interfaces and digital products for client-facing applications, from wireframes through high-

fidelity prototypes.

- Conducted UX research, benchmarking, and usability evaluations; collaborated cross-functionally with product managers and developers to ensure consistent implementation of user-centred designs.

Feb 2022, Mar
2022

Frontend Developer @ Co.Lab

Jun 2022, Sep
2022

DevOps Engineer @ Allianz Technology

Dec 2020, Jan
2022

Client Account Manager @ ADP

2011, 2020

Earlier career

- Partner Business Manager, SELLBYTEL Group (2014 - 2020)
- Junior Fashion Designer, ecological fashion brand internship (2016)
- B2B & Consumer Sales Representative, Apple (2011 - 2013)
